

MICRO EXCHANGE

The easiest way to buy or sell crypto

BRIEF START

Micro Exchange was created in Kyiv on summer 2017. Everything started when a group of people couldn't find where and were thriving to cash out some cryptocurrency.

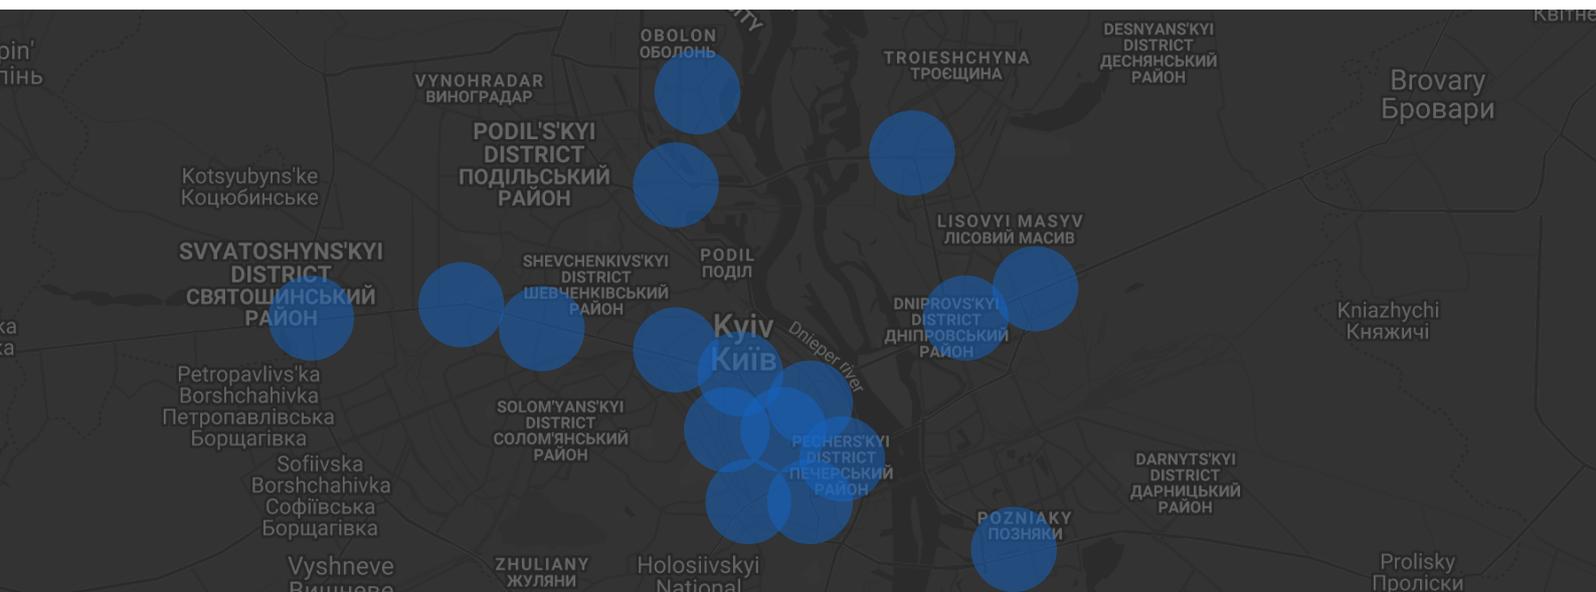

First it was just a \$1,000 investment and a telegram bot. In a little over a year it is one of the leading cryptocurrency to fiat (and vice versa) OTC services with more than 1000 clients served with 100% successful deals.

Cryptocurrency markets develop rapidly, unlike services that exchange fiat money to cryptocurrency. So we are trying to make the best service in Kiev (biggest cities in Ukraine tbd).

SERVICE

We are committed to deliver cryptocurrencies and fiat money to our customers as quick as possible along with a high quality customer service.

That is achieved by our operators and support service who are doing their best 10AM to 9PM every day without weekend. For operative and fast communication with clients we tend to use widely used and secure messengers such as Telegram, WhatsApp, wickr.me and secure XMPP protocol.

AFFILIATE PROGRAMM

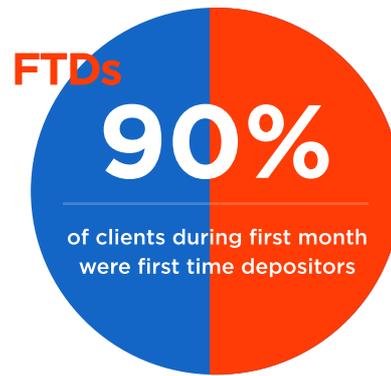

More than

\$2,000 

was paid to affiliates during first month.

MicroExchange Affiliate Program offers a wide variety of options to earn money with our company along with a convenient withdrawal.

We are giving away a 0.5% of the affiliate's deal volume.

We are expecting the return rate as high as 50%.

MICROEXCHANGE RELIABILITY

OTC exchanges should be arranged completely online. To do that, we made our IT infrastructure secured:

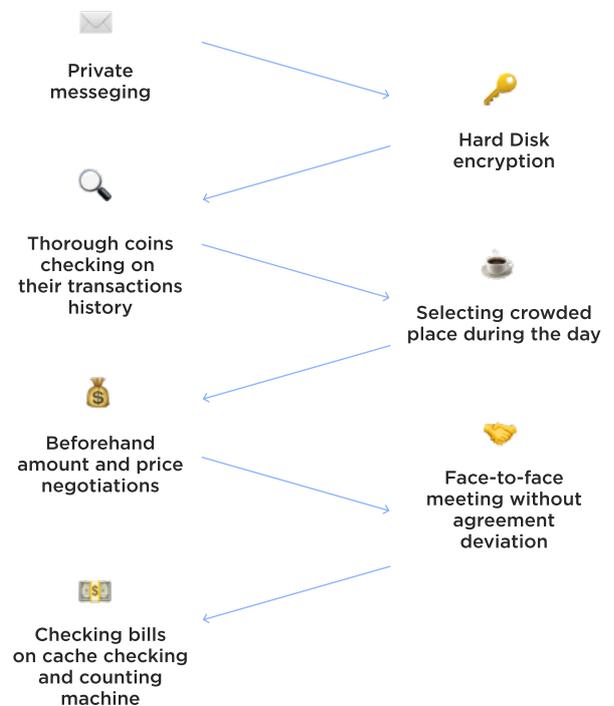

- Private messengers
- Hard disk encryption
- IP address anonymization

We and the client agree on the price and the amount beforehand and limit the transaction size. The actual face-to-face meeting only finalizes the deal, there is no deviation from the agreement!

Our couriers always select a crowded place during the day for meeting with the client. They carry bills checking machine for thorough cash checks and count.

Cryptocurrencies that you buy from Micro Exchange are checked on their previous transaction history so our customers don't get coins, that have suspicious history or were noticed in darknet.
